# Independent advice makes all the difference.

Our energy audits yield excellent rates of return.

Our impartial advice means that our recommendations are in **your** best interests.

We aren't linked to any electricity retailers or solar energy installers. We are independent so we are working to save you money.

## This is how we do it...

- 1** We analyse your power bill - checking for errors. Making sure that you're on the best deal and tariff.
- 2** We conduct a thorough energy audit finding cost effective ways to reduce your bill.
- 3** An energy logger is installed to measure energy usage - checking metering is working correctly, if solar electricity provides a good investment and if equipment is being damaged by poor power quality.
- 4** Electrical switchboards are checked using a thermal camera – reducing the chance of fire and blackouts and can help in reducing insurance costs.
- 5** Checking electrical safety including testing and tagging – helping prevent electric shock incidents and ensuring legal compliance.
- 6** A report is prepared and you can start saving your hard earned money right away!

*“Excellent service .. friendly, prompt & efficient. The cost of their service was saved on the first account after their visit”*

*Carol Toms,  
Bursar  
McAuley College – Grafton*

*“PowerLogic's account analysis and negotiation with our energy supplier was second to none. A small initial investment with PowerLogic has resulted in significant cost savings across our five locations.”*

*Jenny Thorman,  
Member Services Manager,  
Coastline Credit Union*
